James Jacobs was killed on the farm
of A. F. Parsons, on Parchment, Jackson county, last week, by the falling of a
tree, which was cut but lattle more that
half way through when it fell. He and PERHAPS Judge Jackson does not

realize the possible effect on other juries of lecturing a man whom a jury has just refused to convict. That man, moreover, having been tried and acquitted, stands before the law as innocent-as much entitled to respectful treatment as the judge himself.

That is not an obviously good public policy which permits the United States District Attorney to choose whom he will try out of all who have been indict ed. Personal motives, professional ambition or partisan bias may control him in the selection, and innocent men ready and eager for trial may suffer.

A SIAMESE, educated in this country, has returned to the land of his birth to find that he had to converse with his mother through an interpreter, so entirely had his native tongue gone from him. This is a remarkable case, for the boy was fourteen years old when he came to this country, and is now but twenty-four.

A Good Man For a High Place.

From the first the President seems to have been most favorable to Hon. John W. Mason, of this State, for Commissioner of Internal Revenue. The appointment has been delayed by reason of the cilorts of other States, particularly Illinois, to gather in the prize.

Now it is finally settled that in the person of Mr. Mason West Virginia is continue the old business at the old stand. West Virginia Republicans will rejoice to have so high a place filled by a man of so high character. Mr. Mason has fought a good fight

School Compositions.

For the past year Cornell University has had an adjunct to its course in rhetoric which has gone by the name of a school of journalism. This name the authorities repudiate, explaining what it is they sought to do, and an excellent thing it is. They have placed under a professor, who is a trained journalist, some of the more advanced students, to be told something about newspapers and how to write for them. A feature of the instruction has been practical reporting. For example, the students were sent to report something in the university vicinity; their reports were edited and publicly criticised by the professor, all "fine writing," and other redundancies being cut out. The natural result was that the students improve rapidly in keenness of observation and the ability to write well of what they

Rapid progress is being made on the new railroad between Martinsburg and Winchester. Grading is being done and the whole line will be ready for ballast within the next six weeks. The new depot at Winchester will be a commodious building and quite handsome, of the latest style of architecture, and will meet the requirements of the traveling public in the neighborhood. This new road will be one of the greatest conveniences that was ever creeted in that neighborhood, and bids fair to be a profitable investment to the stockholders who embarked in the enterprise.

The Weston Democrat says: A report came here Monday of a serious accident that happened on Skin creek Sunday night. As we gathered the facts the particulars are as follows: Guy Duncan, who was spending the evening with Miss Carrie Radebaugh, a young girl of the neighborhood, was about to take his departure when she discovered he had a pistol in his overcoat pocket, which is he endeavored to take from him. In the scuffle which ensued the revolver was accidentally discharged, the ball taking effect and inflicting a painful though not a serious injury in the girl's side. It was a narrow escape from death. It was a narrow escape from

Mr. Mason has fought a good fight through the long years in which West Virginia Republicans have been battling. He was a Union soldier and a good one. He has borne himself well in every relation, and he steps naturally into this high preferment.

Having no fuse they substituted a cloth saturated with coal oil and gun powder, rolled in the centre. Young frice applied the fatal match, and the explosion followed so suddenly that he was unable to get out of the way. The tree was blown to fragments, and the young man so hadly injured that death followed in a few hours.

usual hair-pulling among Southern aspirants."

It was so under former Republican administrations. It was so under President Cleveland. Southern politicians had not exactly a monopoly of the hair-pulling, but they drove the liveliest traffle in that uncanny business.

Perhaps the Southern politician fights no harder than his Northern brother when there are good things going, but in numerous campaigns he has shown a peculiar capacity for mean work. If he can't get what he wants he "undertakes to say" that no other fellow from his State shall have it. So it comes to pass that the appointing power has a hard row to hoe in the matter of Southern appointments.

Deafness is caused by an inflamed condition of the mucus lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucus surfaces.
